Dear Michael,

**FIRE SERVICE ACT REVIEW**

Please find attached State Fire Management Council's (SFMC) formal submission to the Fire Service Act Review.

SFMC continues its theme of introducing, contemporary governance, efficiency's, effectiveness, accountability, and monitoring, to all the areas we cover in our submission.

We also urge that the Fire Service Act must be inclusive of all areas, and the present silo mentality must be broken down.

To build on and value add the good work the TFS does, change and implementation needs to happen sooner than later.

I would like to thank you for taking the time to meet and consult with me. If you have any questions regarding this response, please feel free to contact me.

Yours sincerely

Ian Sauer
