

Name	Have your say
Roger Howlett	<p>I tried to complete the have your say on line but not very user friendly</p> <p>My comments in relation to the funding model are:</p> <p>Any change to the funding model should be equitable for all property owners. In an urban residential area, the cost to provide fire and other services is the same.</p> <p>A good example is the reform that has been undertaken by Tas Water re fixed charges.</p> <p>The suggestion that the cost should be based on AAV or Capital value of a property is very discriminatory. I strongly oppose this approach as the basis for future funding.</p> <p>Any future funding model should be equitable to each class of landowners.</p> <p>Other social assistance should be provided by other mechanisms and not be subsidized by owners of properties with higher values</p> <p>Roger Howlett</p>
